

GSM | GPRS

GT863-PY

Terminal

0101 Telit Unified
0101 AT Command Set

4 GPRS Quad Band GPRS

GPRS Class 10

RoHS Compliant

SIM SIM Access Profile

PYTHON* Script Interpreter

Embedded FTP and SMTP Client

Extended Temperature Range

Extended RF Sensitivity

Serial Port Multiplexer (GSM 7.10)

Embedded TCP/IP Stack

The Telit GT863-PY terminal is a complete encased modem solution for wireless m2m applications.

GT863-PY is the new generation of Telit terminals based on the quad-band and RoHS compliant GE863 core engine incorporating additional and new features.

The GT863-PY featuring the embedded Python* script interpreter provides the possibility for running customer programs inside the modem, thus making the terminal a complete self-contained application platform for customer solutions. Programmable I/O ports and the IIC-Bus can be used for monitoring external signals, connecting sensors, and switching external devices. The GT863-PY is capable of communicating through all traditional data services provided by GSM/GPRS networks. As with all Telit modules, the GT863-PY offers jamming detection functionality allowing the unit to sense attempts to disrupt the GSM communication by interference with the GSM signal.

Directly controlled by a standard serial RS-232 interface and offering a broad supply voltage range (9–24 V DC), the GT863-PY is a universal solution for most low-volume m2m and mobile data applications.

As a part of Telit's corporate policy of environmental protection, all products comply to the RoHS (Restriction of Hazardous Substances) directive of the European Union (EU Directive 2002/95/EG).

Product features

- Quad-band EGSM 850 / 900 / 1800 / 1900 MHz
- Output power
 - Class 4 (2W) @ 850 / 900 MHz
 - Class 1 (1W) @ 1800 / 1900 MHz
- Control via AT commands according to GSM 07.05, 07.07 and Telit enhancements
- Supply voltage range: 9–24 V DC
- TCP/IP stack access via AT commands
- Power consumption (typical)
 - Idle (registered, power saving): < 12 mA
 - Dedicated mode: 110 mA
 - GPRS cl.10: < 550 mA
- Sensitivity:
 - 107 dBm (typ.) @ 850 / 900 MHz
 - 106 dBm (typ.) @ 1800 / 1900 MHz
- Dimensions: 107 x 64 x 33 mm
- Weight: 135 grams
- Temp. range: -20°C to +70°C

GT863-PY

Terminal

Interfaces

- 4 General purpose I/O or IIC Bus
- D-type 9 pin RS-232 connector
- Serial Interface
 - Baud rate from 300 to 115,200 bps
 - Autobauding from 2,400 to 38,400 bps
 - Short circuit (to ground) protection on all outputs.
 - ITU-T V.24 serial link
- SMA female, 50 Ohm RF connector
- RJ11 / 6 pin for GPIOs
- Power connector with 4 pin
Input power = 9 -24 VDC @ 1.2 A min
- On board SIM card holder, 3V with real-time detection

Audio

- Telephony, emergency call
- Half rate, full rate, enhanced full rate and adaptive multi rate voice codecs (HR, FR, EFR)
- Superior echo cancellation & noise reduction
- DTMF

Approvals

- Fully type approved conforming with R&TTE directive
- CE

SMS

- Point-to-point mobile originated and mobile terminated SMS
- Concatenated SMS supported
- SMS cell broadcast
- Text and PDU mode

Circuit switched data transmission

- Asynchronous transparent circuit switched Data (CSD) up to 14.4 Kbps
- Asynchronous non-transparent CSD up to 9.6 Kbps
- V.110

GPRS data

- GPRS class 10
- Mobile station class B
- Coding scheme 1 to 4
- PBCCH support

Fax

- Group 3, class 1

GSM supplementary

- Call forwarding
- Call barring
- Call waiting
- Advice of charge
- Calling line identification presentation (CLIP)
- Calling line identification restriction (CLIR)
- Unstructured supplementary services mobile originated data (USSD)
- Closed user group

Additional features

- SIM phonebook
- Fixed dialing number (FDN)
- Real-time clock
- Alarm management
- Buzzer management
- Status LED support
- IRA character set
- Jamming detection & report
- Embedded TCP/IP stack, including TCP, IP, UDP, SMTP and FTP protocols

Python* application resources

- Python* script interpreter (module takes the application code directly in the Python* language)
- Memory: 3 MB of NV memory for the user scripts and 1.5 MB RAM for the Python* engine usage
- Over-the-air application SW update
- IIC Bus and SPI Bus controlled in Python*

Telit's EASY features

- EASY SCAN® automatic scan over GSM frequencies (with or without SIM card)

Order-No.
