

Watchdog System WDS 44-ETH

Principale Schematic Application 1 (Ethernet 10/100 MHz)

Watchdog System WDS 44-IND :

The Watchdog System is using the Ethernet Interface (10/100 MHz) as Watchdog Trigger Source

Function:

Periodically the Application *Advanced Host Monitor* sends a specific O.K. telegram via the ethernet to the Watchdog Unit. If this telegram is missing, the configured Watchdog driver output(s) will be activated.
