

Watchdog System WDS 44-IND

Principale Schematic Application 1 (RS-232)

Watchdog System WDS 44-IND :

The Watchdog System is using the Serial Interface (RS-232) of the Network Monitoring System as Watchdog Trigger Source

Function:

Periodically the Application *Advanced Host Monitor* sends a specific O.K. telegram to the Watchdog Unit. If this telegram is missing, the configured Watchdog driver output(s) will be activated.
